D11. In general, when you have receptive anal intercourse, is the lubricant applied...: *Indicate all that apply*

1. Directly on your partner's penis
2. Around your anus (rim)
3. Inside your rectum
4. Inside the condom
5. On the outside of the condom
6. Other, *please specify*: _____

D12. When you are having receptive anal intercourse, who applies the lubricant?

1. Self
2. Partner
3. Both

D13. If you are going to have receptive anal intercourse, when is the lubricant first applied?

1. Before he penetrates you
2. After he first penetrates you

D14. How many times do you usually reapply the commercial lubricant during receptive anal intercourse?

1. Never
2. Once
3. Twice
4. 3 times or more

D15. From your past experiences, does the application of the lubricant interrupt sex?

1. It does not interrupt sex
2. It interrupts sex but does not bother me
3. It interrupts sex and bothers me

SECTION E. SUBSTANCE USE

The following questions refer to alcohol and drug use. Remember, your answers are confidential and will not be viewed by clinic staff.

E1. Now I will show you a list of different drugs. During the last 30 days, how often have you used each of the following substances?

GO DOWN "A" COLUMN FIRST. IF "0" FOR ANY SUBSTANCES, SKIP B FOR THOSE PARTICULAR SUBSTANCES.

	[A] Number of times used in past 30 days	[B] Number of times used before or during sex in past 30 days
a. Alcohol (beer, wine, liquor)	___ ___ times	___ ___ times
b. Marijuana/hashish/pot/weed	___ ___ times	___ ___ times
c. Ecstasy/MDMA	___ ___ times	___ ___ times
d. Crystal Meth/amphetamines/ methamphetamines/speed/crank/ice	___ ___ times	___ ___ times
e. Ketamine/special K	___ ___ times	___ ___ times
f. GHB (Gamma hydroxybutyrate)	___ ___ times	___ ___ times
g. Other hallucinogens/LSD/ mushrooms	___ ___ times	___ ___ times
h. Poppers/amyl nitrate/butyl nitrate	___ ___ times	___ ___ times
i. Crack	___ ___ times	___ ___ times
j. Cocaine (not crack)	___ ___ times	___ ___ times
k. Heroin	___ ___ times	___ ___ times
l. Any other pharmaceutical drugs not prescribed to you by a physician	___ ___ times	___ ___ times
m. Other, <i>please specify</i> : _____	___ ___ times	___ ___ times

E2. Thinking about the times you used alcohol during the last 30 days, how much did you typically use?

1. Too little to feel any effect
2. Enough to feel it a little
3. Enough to feel it a lot
4. Enough to get drunk
5. Enough to feel like you might pass out

SECTION F. PrEP (PRE-EXPOSURE PROPHYLAXIS)

Currently, researchers are examining a medical HIV prevention method called Pre-Exposure Prophylaxis, or PrEP. People who use Pre-Exposure Prophylaxis, or PrEP might have to take a pill either every day or at least a couple of hours prior to sex, to counteract or at least decrease the chances of becoming infected if they came in contact with HIV.

F1. Have you heard about pre-exposure prophylaxis (PrEP) before?

- 1. Yes
- 2. No **[GO TO F3]**

F2. How did you first hear about PrEP? Was it through... *Indicate all that apply*

- 1. A friend
- 2. The media
- 3. A medical provider
- 4. A sex partner
- 5. Online
- 6. Other, *please specify:* _____

There is some evidence that taking medication before sex may prevent someone from catching HIV.

F3. Have you ever taken any medication before having sex as protection against HIV?

- 1. Yes
- 2. No **[IF NO, GO TO F6]**

F4. What medication did you take?

F5. How did you get it?

- 1. Physician
- 2. Friend
- 3. Over the Internet
- 4. Other, *please specify:* _____

F6. Do you have any friends who take medication before having sex to avoid becoming HIV infected?

- 1. Yes
- 2. No
- 3. Not sure

F7. Please indicate your agreement with the following statements.

4	3	2	1	0
Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree

I would not take anti-HIV drugs because I am concerned about their side effects.

I would know how to get anti-HIV drugs if I wanted them.

I could not afford anti-HIV drugs.

SECTION G. RECTAL MICROBICIDE INTENTIONS

Scientists are trying to develop alternatives to condoms for the prevention of HIV transmission during intercourse. Microbicides could be one such alternative.

G1. If a rectal microbicide were available that provided some protection against HIV, and it came in the form of a gel (microbical gel), how likely would you be to use it every time you have **receptive anal intercourse**?

0	1	2	3	4
Extremely Unlikely	Unlikely	Neither	Likely	Extremely Likely

G2. How likely would you be to use it every time you have **receptive anal intercourse** with a **lover**?

0	1	2	3	4
Extremely Unlikely	Unlikely	Neither	Likely	Extremely Likely

G3. How likely would you be to use a microbical gel every time you have **receptive anal intercourse** with a **one-night stand**?

0	1	2	3	4
Extremely Unlikely	Unlikely	Neither	Likely	Extremely Likely

G4. How likely would you be to use a microbical gel every time you have **receptive anal intercourse** with other partners, men who were neither your **lovers** nor **one-night stands**?

0	1	2	3	4
Extremely Unlikely	Unlikely	Neither	Likely	Extremely Likely

G5. How likely would you be to use a microbical gel for receptive anal intercourse if you were using alcohol or drugs?

0	1	2	3	4
Extremely Unlikely	Unlikely	Neither	Likely	Extremely Likely

G6. If a rectal microbicide were available that provided some protection against HIV, and it came in the form of a suppository, how likely would you be to use it every time you have receptive anal intercourse?

0	1	2	3	4
Extremely Unlikely	Unlikely	Neither	Likely	Extremely Likely

G7. If a rectal microbicide were available that provided some protection against HIV, and it came in the form of an enema, how likely would you be to use it every time you have receptive anal intercourse?

0	1	2	3	4
Extremely Unlikely	Unlikely	Neither	Likely	Extremely Likely

SECTION H. MOTIVATION & ADDITIONAL COMMENTS

H1. Please indicate the top **3 main** reason(s) you joined this research study.

1. To receive the financial reimbursement
2. To be provided with free health care during the study, or to get higher quality health care
3. To be tested for HIV

4. To get educated or find out more about HIV
5. To help test a product that may prevent men and women from getting HIV
6. To contribute to scientific knowledge
7. To satisfy my curiosity about participating in a study
8. A friend/family member recommended that I join the study
9. I am worried about getting infected with HIV
10. My health care provider recommended I join the study
11. Other, *please specify*: _____

We are close to the end of the interview.

H2. Is there anything that we haven't asked that you think we should have?
