

Intro:

The following survey will ask you questions about recent events in your life and relationships, your behavior, and your experiences with PrEP or the dapivirine ring. Some of the questions may seem very personal, but please remember that all of your answers will be kept confidential. With the computer, no one else can see or hear the questions and no one can see your answers, so please be as truthful as you can.

You can skip any question that makes you feel uncomfortable or stop taking the survey at any time. None of your answers will affect your ability to stay in the study.

During this interview, when we say “tablets” we are talking about the tablets you are taking in this study, and when we say “ring” we are talking about the ring you are using in this study.

Some questions will ask you about your life or behavior during a specific time period (for example, “in the past 30 days”). Please pay close attention to the time period and only tell us about your behavior during that time.

The survey will take about 20-30 minutes to complete. Only use the "Previous" (White) and "Next" (Green) buttons at the bottom of each page to move through the survey.

If you have questions or need assistance, please ask a member of the study staff.
