

MTN-020 Data Communiqué #15 – February 25, 2015

This is official study documentation for MTN- 020. Please circulate it among relevant staff for their review, print it, and place it in your MTN-020 SSP Manual in the Data Communiqués section. This document is considered part of the MTN-020 SSP manual.

UPDATES – none

CLARIFICATIONS

1. Social Influences Assessment (SOC-1) CRF, item 1

In item 1 of the Social Influences Assessment CRF, indicate the total number of people the participant has talked to about the ASPIRE study who are not study staff. This total number could include, but is not limited to, family members, friends, study participants, and/or peer recruiters. If a participant has discussed the ASPIRE study with 99 or more people, record '99' in the boxes provided. If a participant cannot recall the specific number of women to whom she has talked about the ASPIRE study, an estimated guess should be recorded.

2. Social Influences Assessment (SOC-1) CRF, items 2-6

Items 2-6 are meant to capture more detailed information about up to 5 people that the participant considers the most influential to her study participation and use of the study ring. If the participant indicates that she has talked to more than 5 people about ASPIRE in item 1, she should be asked to focus on the 5 people who have had the greatest influence when responding to items 2-6.
