7.1 HOPE Behavioral Assessments

The following general guidance relates to administration of all interviewer-administered behavioral CRFs:

- All interviewer-administered CRFs should be administered in the preferred language of the participant. This may be different than the language she provided informed consent in, as long as fluency is confirmed documented in both languages (e.g. on the IC coversheet and/or chart notes). Any deviation from this should be documented in the participant chart notes.

- In order to standardize interviewer-administered data collection from site to site and to maximize quality, it is critical that participant interviews be conducted with a non-biased, non-judgmental approach. Study staff should help a participant feel comfortable sharing personal information and opinions while asking the study questions in a consistent manner from participant to participant.

- Study staff administering behavioral CRFs should be a different person than staff providing Options counseling so as to ensure honest responses.

- At visits where both counseling and behavioral CRFs are administered, it is recommended that CRFs are administered prior to Options counseling sessions.
• No counseling or correction of misinformation should ever be provided during the interview/data collection process. However, it is recognized that some information reported during the interview may prompt further action, in which case the guidance below should be followed:
  
  o If information reported during an interview relates directly to participant’s safety and well-being—specifically, if violence/abuse, sexual assault, social harms, food insecurity, or AEs are reported—the participant should be followed up on an individual level to collect additional information as needed and to provide referrals for the well-being of the participant. This should be done after the interview and by a separate staff member. See also SSP section 11 for further management of AEs, social harms, IPV, or sexual assault.

  o If information reported during the interview reflects any other issue or misunderstanding (e.g. misunderstanding of efficacy, worries about the ring, or unhealthy vaginal practices) the participant should not be counseled directly regarding these issues. Rather, to prevent future bias in her responses, these topics should be addressed at a group or site-level through generalized education or counseling.

• Staff should be mindful that some topics on behavioral CRFs and within qualitative interviews (as applicable, for qualitative sites) may also be discussed as part of the counseling sessions—effort should be made to acknowledge this when appropriate with the participants to ease feeling fatigue from redundant study procedures (e.g. “I’m going to ask you some questions now and record your responses on these forms. This part of your visit is independent from the counseling you will receive later in your visit. I will only share information with other team members if it relates to ensuring your safety and well-being. I encourage you to raise any concerns or questions you may have during your counseling session as needed.”)

In addition to the ACASI questionnaires outlined in the proceeding sections, all participants will complete the following interviewer-administered behavioral case report forms (CRFs):

<table>
<thead>
<tr>
<th>Interview-Administered Behavioral CRFs</th>
<th>Purpose</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Baseline Behavior Assessment</td>
<td>Baseline information on participant’s sexual behavior, partner(s), intimate partner violence, sexual assault, HIV risk perception, ring worries, understanding of ring efficacy, and willingness to enroll in MTN-025.</td>
<td>Physical harm or sexual assault by a stranger or other non-partner (the person could be known, but not presently or historically chosen as a partner) should not be captured by items 14a, 14b, or 15 relating to physical harm or forced sex inflicted by a sexual partner. Sexual assault inflicted by a non-partner should be captured under item 15a. See SSP section 11 for required management/referral in the event a participant reports intimate partner violence (IPV) or sexual assault, including capturing these events as AEs or Social Harms, if applicable.</td>
</tr>
</tbody>
</table>
Behavior Assessment | Follow-up behavioral information, similar to that collected at baseline. | See baseline behavioral assessment notes for items relating to physical harm or forced sex inflicted by a sexual partner. Items 11a, 12, and 13 capture events inflicted by a current or former sexual partner; Item 13a captures sexual assault from a non-partner.

Study Exit Assessment | Study exit information on participant engagement is study group activities, sexual behavioral, impressions of participation in HOPE, ring sharing and interest in ring in the future. |  

Baseline Vaginal Practices | Baseline information on participant’s vaginal practices. |  

Vaginal Practices | Follow-up information on participant’s vaginal practices. |  

Other behavioral non-interviewer-administered forms include:

<table>
<thead>
<tr>
<th>Other Behavioral CRFs</th>
<th>Purpose</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Demographics</td>
<td>Baseline demographic and socioeconomic information including age, education, living situation, and relationship status.</td>
<td>Study staff should make appropriate referrals to local resources where available, if participants report food insecurity.</td>
</tr>
<tr>
<td>Ring Adherence</td>
<td>Follow-up information on the participant’s self-reported ring use.</td>
<td></td>
</tr>
</tbody>
</table>

Social Influences Assessment | Identify people in the participant’s life who may have influenced her study participation and use of the study ring. |  

Social Influences Supplement | Capture the relationship between individuals listed in the Social Influences CRF and determine if and how well they know each other. | Refer to the Social Influence Supplement Administration Tool available on the HOPE website for support (http://www.mtnstopshiv.org/node/7330). |

Social Impact Log | Record occurrence and resolution (if any) of any harm or negative experience experienced by participant as a result of the study or ring. | Per protocol, study staff should probe for social harms related to study participation at quarterly visits. Sites should also use this log to report social harms that are reported spontaneously. |
at any point in follow-up. If the participant needs help understanding the question about social harms during the behavioral assessment, say something like, “Did something BAD happen to you as a result of you being in HOPE or getting the ring?”

Social Benefit Log: A participant will be prompted about social benefits through a question on the behavior assessment (BA), asked quarterly. A social benefit is a positive change, event, or experience in her life related to her study participation or ring use. When administering this question, the staff member should read it verbatim and allow the participant to respond. If the participant needs additional clarifying information in order to understand the question, this can be provided, but staff should avoid providing too many examples, as this may bias the participant’s responses (she may be more likely to say “yes” to the specific examples provided). If the participant reports that she has experienced a social benefit, study staff will be prompted to complete a Social Benefit Log. The Social Benefit Log is similar to the Social Impact Log but it captures positive events due to study participation rather than negative events.

Like the Social Impact Log, study staff should fill out one form for each social benefit experienced during the 3 months since last study visit. Social benefits may include events related to Personal, Medical/Health, and/or Community/Social (see tables below for specific categories). Additionally, for each social benefit, staff should capture who else (up to 3 people) benefited from the event besides the participant using the appropriate relationship code. For social benefits, no follow-up is necessary once reported since these are positive events rather than harmful events (such as is captured on the social impact log).

<table>
<thead>
<tr>
<th>Social Benefits - Personal</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Pride about project participation:</strong> Feels pride about participation in HOPE</td>
</tr>
<tr>
<td><strong>Feeling better about oneself:</strong> Improved self-esteem or feeling of empowerment</td>
</tr>
<tr>
<td><strong>Education:</strong> The study educated the participant or inspired /enabled participant to restart school or improve school performance.</td>
</tr>
<tr>
<td><strong>Housing:</strong> The participant obtained better or improved her housing situation</td>
</tr>
<tr>
<td><strong>Nutrition/food:</strong> The participant was able to improve nutrition or amount of food intake for self or family.</td>
</tr>
<tr>
<td><strong>Improved communication:</strong> Participant learned more effective ways of communicating with family, friends, employers or others.</td>
</tr>
<tr>
<td><strong>Work:</strong> Obtained or improved employment situation (includes informal work)</td>
</tr>
<tr>
<td><strong>Income:</strong> Obtained or increased income (includes getting study reimbursement)</td>
</tr>
<tr>
<td><strong>Social Benefits – Medical/Health</strong></td>
</tr>
<tr>
<td><strong>HIV testing:</strong> The participant received regular HIV testing</td>
</tr>
<tr>
<td><strong>Treatment of STIs:</strong> The participant was able to treat STIs</td>
</tr>
<tr>
<td><strong>Treatment of other illnesses:</strong> The participant was able to treat/consult with a doctor about other illnesses (non-STIs)</td>
</tr>
<tr>
<td><strong>Family Planning/Contraception:</strong> The participant was able to access contraception and family planning services</td>
</tr>
<tr>
<td><strong>Preventative care services:</strong> The participant was able to receive preventative health care such as pap smears.</td>
</tr>
<tr>
<td><strong>Staying HIV free:</strong> HOPE provided more effective ways for the participant to avoid becoming infected with HIV</td>
</tr>
<tr>
<td><strong>Social Benefits – Community/Social</strong></td>
</tr>
<tr>
<td><strong>Altruism:</strong> Participant helping community/others by participating in HOPE</td>
</tr>
<tr>
<td><strong>Activities:</strong> Participant became involved in community activities</td>
</tr>
<tr>
<td><strong>Peer Support:</strong> Participant felt supported by or was able to provide support to peers</td>
</tr>
<tr>
<td><strong>New relationships:</strong> Participant created new relationships</td>
</tr>
<tr>
<td><strong>Other</strong></td>
</tr>
</tbody>
</table>

NOTE: Discrepancies may arise between what a participant says in her qualitative interview (for qualitative sites), counseling sessions, and what she reports on per-participant reported items within CRFs. It is not expected that this information be reconciled, nor is it expected that discrepancies be acknowledged in the source documentation. Interviewers can make note in the interview debrief report if the discrepancy is mentioned by the participant (see SSP Section 18 for more details on the qualitative component), but this is not required.

### 7.2 HOPE ACASI Schedule

All participants will complete the Baseline ACASI questionnaire at the Enrollment visit. Participants will also complete an ACASI questionnaire at the Month 3 visit and PUEV, unless they have permanently discontinued from study product by this time (further addressed below). The ACASI Tracking CRF (including the ACASI Tracking Y/N prompt) should be completed in conjunction with ACASI.

Participants who have been permanently discontinued from study product prior to the PUEV will complete the PUEV/Discontinuers ACASI questionnaire at the visit the discontinuation is initiated (or next regularly scheduled visit if this is done at an interim visit). No further ACASI questionnaires are completed for these participants.

If a participant permanently discontinues from study product use at her Month 3 visit, the PUEV/Discontinuers ACASI is administered at this visit instead of the Month 3 ACASI. As usual, only one ACASI Tracking CRF (including the ACASI Tracking Y/N prompt) is completed at the Month 3 visit, with the PUEV/Discontinuers survey selected (there is no need to document that the Month 3 ACASI was not completed).

If the ACASI is not done within the visit window for any reason, it is not made up at a later visit – it should be documented as missed. This guidance applies to all visits where ACASI is required – Enrollment, Month 3, PUEV, or early permanent discontinuation of study product visits. Document the reason for the missed ACASI in chart notes, ACASI Tracking Y/N CRF, or other source documentation as applicable (e.g. participant refusal).
If at a visit, an ACASI interview is begun, but not completed, every effort should be made to complete the entire ACASI questionnaire (starting from the beginning) on a day within the visit window as part of a split visit. If the ACASI questionnaire is not able to be completed in its entirety during the visit window, it should be documented as missed.

### 7.3 HOPE ACASI Equipment

Each participating MTN-025 study site has been provided with the following ACASI equipment:

- Touch screen ACASI computers (each equipped with a 2GB Secure Digital (SD) storage card) and chargers (touch screen computer)
- Designated ACASI laptop computer for Data Manager function and charger (data manager computer)
- USB portable data storage device (“USB key”)
- Audio headphones
- Stylus

The above-listed equipment may be used for purposes of ACASI data collection and transfer only. The equipment should not be used for any other office, business, or leisure activities. No additional software should be installed on any of the computers and the computers should not be used for word processing, browsing the Internet, or any other application. No technical changes should be made to any of the equipment unless directed by ACASI support personnel at the Population Council or MTN Statistical and Data Management Center (SDMC) i.e. SCHARP.

In the event that the laptop battery loses power, the touch screen ACASI computers are configured to automatically power down and go into hibernation. In this state the laptop will save whatever is on the screen to disk. The depleted laptop battery can then be replaced with a charged battery and the unit can then be turned back on. After turning on the touch screen computer, the power-on security password (see p.5, item #3) will need to be entered, and then the laptop will display the screen as it was before going into hibernation. It is important to keep all touch screen laptop batteries charged and available for use so that they can be available during power outages.

Please note that if you flatten the screen over the keyboard, you will need to adjust the orientation of the display by clicking the Swivel button. This button is on the bottom of the display, to the left of the center, and has an icon that shows a landscape changing to portrait display.

ONLY the data manager computer can be connected to the internet, and only when uploading data to the SCHARP ATLAS portal. For computer security reasons, no touch screen computer should ever be connected to the internet unless instructed by the ACASI technical support team.

Each participating study site must specify in its site specific data management standard operating procedures (SOPs) for MTN-025 where the above listed equipment will be securely stored and which study staff are authorized to access the equipment. Study staff designated as responsible for proper storage of the touch screen computers should perform the following daily maintenance tasks with each touch screen computer on each workday:
• Turn on the touch screen computer and enter a valid User ID (see below for more information on User IDs)
• Verify that the touch screen computer boots up properly and is functioning
• Verify that the assigned (labeled to match computer name) SD card has been inserted in the touch screen computer
• Verify that a stylus is present in the stylus slot of the touch screen computer
• Clean the touch screen computer screen with cloth. DO NOT use liquid cleanser or water
• Charge the touch screen computer and ensure the battery is full at the start of each work day (in case of unexpected brown outs)

At the end of each workday, after performing required data backup and transfer tasks, study staff designated as responsible for proper storage of the touch screen computers and the data manager computer should ensure that the computers have been properly turned off and plugged in to recharge the batteries. Place the computers in a secure, dry location until the next day of use.

7.4 HOPE ACASI User ID Numbers

Each participating HOPE study site has been provided two different types of User ID numbers to be assigned to study staff involved in collecting and transferring ACASI data, as follows:

• ACASI Administrator: persons responsible for administering ACASI interviews with study participants
• ACASI Computer data managers: persons responsible for performing ACASI data back-ups and transfers to the MTN SDMC (i.e. SCHARP)

Each ACASI Computer data manager is assigned his/her own unique ACASI Administrator ID, as well as a Windows login and password. The Windows logins are used on the data manager computers.

User IDs will be assigned to study staff using assignment forms provided in sealed envelopes. As User IDs are assigned, each staff member assigned an ID must sign and date his/her assignment form to acknowledge receipt of his/her User ID. Signed original forms should be maintained with other MTN-025 Essential Documents related to study staffing. A copy of each signed form should be provided to Samir Souidi ssouidi@popcouncil.org at the Population Council. Also contact Samir Souidi ssouidi@popcouncil.org if additional User IDs, which includes requests for the SCHARP Atlas access to the ACASI upload section, are needed.

NOTES ON SECURITY:

• Study staff to whom ACASI User IDs are assigned should not share their User IDs or passwords with anyone else.
• Each staff member should always use the same User ID and password.

7.5 HOPE ACASI Administrator Reference

Refer to Appendix 7-3 for general guidelines on setting up the participants for the ACASI interview.
Figure 7-1
Turning on the Touch-Screen Laptop Computer

1. Open the cover and press the white button at the top of the keyboard to turn on the laptop.
2. Retrieve the stylus from the right side of the computer by pressing it until it pops out.
3. A few seconds after the computer has been turned on, you will see a picture of a lock, which indicates that you need to enter the password. The power-on security password is \texttt{dvd15}.
4. Windows login – User name: \texttt{acuser}, Password: \texttt{color93}
Administrative Setup

As the ACASI Administrator, you will be prompted to enter some information into the computer before the participant practice session and subsequent ACASI interview. There is no audio associated with entry of this information. **Note:** you must use the dropdown menu for questions below for data to be accepted.

You will be prompted to enter:

- Your Administrator ID
- The Participant ID number (PTID)
- The visit date
- The participant’s number of children who were born alive (per her self-report at the time of the ACASI interview)
- The last time the participant went to the market (per her self-report at the time of the ACASI interview)
- The participant’s degree of difficulty in getting to the market (per her self-report at the time of the ACASI interview)
- The method of transportation that the participant used to get to the clinic on the day of the survey (per her self-report at the time of the ACASI interview)

The administrator should enter all required information using either the physical keyboard or the screen keyboard and the stylus or mouse. If you are using the screen keyboard and you need to enter a number, tap into the box that requires the number and the keyboard (Figure 7-2) should appear on the screen.

![Figure 7-2](image)

Entering the Administrative Information

1. **Administrator ID:** Each ACASI Administrator has been assigned an ACASI user ID. Enter this ID as your Administrator ID by tapping on the keyboard screen with the stylus (or clicking with the mouse) and then tapping the green Submit button. Your ID will be masked, since it also serves as a security procedure for accessing the program. **If you enter an incorrect ID, you will...**
see the error message below (Figure 7-3). If the Administrator ID entered is not a permissible login, you will receive the pop-up error message to “Please enter a valid administrator ID”.

![Figure 7-3](image)

Administrator ID’s assigned by location:

- 100-275 – MRC
- 300-325 – Cape Town
- 326-349 – WRHI
- 350-375 – Uganda
- 376-399 – Blantyre
- 400-475 – Zimbabwe
- 476-499 – Lilongwe
- 526-550 – eThekwini

2. On the next screen, tap the New Survey button (Figure 7-4):

![Figure 7-4](image)

3. On the next screen select the appropriate MTN-025 questionnaire and then tap the START SURVEY button (Figure 7-5). Once you have selected a survey, its box will turn yellow. If you press the START SURVEY button before selecting a survey, you will see the error message below.
If you see an error message indicating that the SD card is missing (Figure 7-6, left), you should check to make sure that it is inserted properly. You may need to remove and re-insert it. If you see an error message that the SD card is locked (Figure 7-6, right), follow the instructions in Figure 7-13.

4. Enter the correct PTID in the Participant ID field. Confirm that the correct PTID was entered by entering it a second time, and then tap the green Next button. If the two PTIDs do not match, you will see the error message below (Figure 7-7A).
NOTE:

If you are entering test data, it is important that you enter one of the Test PTIDs listed in Appendix 7-1 of this document. Any Test PTID can be used, and Test PTIDs can be used more than once.
5. Confirm the visit date. The visit date will be filled automatically with the current date, using the numeric format dd/mm/yyyy (for example, 17/04/2020) but you must also confirm the visit date by selecting the appropriate two-digit day, three-character month, and 4-digit year from the drop-down menu. You may also change the default date if necessary. **When done, tap the green Next button.**

![Visit Date](Figure 7-8)

6. In the next dialog boxes, shown in figure 7-9, you will enter the same information that the participant will be asked in the practice questions. If you try to go to the next screen without entering this information, you will see the dialog box shown in Figure 7-8.

First, choose the appropriate ACASI language from the drop-down list (Figure 7-9A).

Next, ask the participant how many children she has had who were alive at birth and select that number from the pull down menu (Figure 7-9B). Note: It is not necessary to obtain or verify the number of children from the participant’s study records. However, the number entered here will have to match the number that she enters for Practice Question 2 (PQ2).

Next, enter the participant’s age. This number will need to match what is entered in Practice Question 3 (PQ3).

Ask the participant the last time she went to the market and select the corresponding number from the pull-down menu (Figure 7-9D). This number will need to match what is entered in Practice Question 4 (PQ4).

Ask the participant how difficult it is for her to get to the market and select the corresponding response from the pull-down menu (Figure7- 9E). This number will need to match what is entered in Practice Question 5 (PQ5).

Ask the participant on how she got to the clinic today and select her response from the pull down menu (Figure 7-9F). The response entered here will have to match the response entered for Practice Question 6 (PQ6).
7. After completing the above steps, tap the green Next button. A screen with a bar labeled “PRACTICE QUESTIONS” will appear (Figure 7-10).

DO NOT tap the "PRACTICE QUESTIONS" bar until you have set up the participant for the interview and are ready to turn over the computer to her.
8. Turn the computer screen around and then turn over the computer to the participant.

With one hand on the base/keyboard, use your other hand to twist the screen away from you to the left, in the direction of the arrow that you will see where the keyboard and display are connected.

Setting Up the Participant for the Interview

Refer to the ACASI training script in section 7-5 this manual to set up the participant for the interview and begin the ACASI training session.

Audio-headphone training: Connect the headphones to the touch screen computer by plugging them into the port on the right side of the laptop with the picture of a headphone - . Ask the participant if she has ever used headphones before and show her how they work, including using the dial on the cable/wire to adjust the volume.

Show the participant how to put the headphones on. The side of the headphone labeled R should cover the right ear and the side labeled L, the left ear.

Stylus/touch screen training: The participant should be shown how to use the stylus – tap lightly and as straight as possible. For most questions participants may tap the black square, the red square, yellow square or numbered boxes

Additional Instructions: Instruct the participant on the following:

- If she wants to change her answer to the previous question, she can tap the white (Previous) button. She can only go back to the question immediately preceding the current screen, after that, the previous button will be grayed out.

- If she wants to hear a question again, she can click on the blue “Repeat Question” bar at the top of the screen, with the picture of the woman.

- If she has any other problems or would like to stop the interview for any reason, she should let you know. (Advise her on where to find you. You should be nearby so she can find you easily, but for privacy reasons you should not stay in the same room as the participant when she is doing her interview).

- If she would like to skip a question, the participant may press the small white circle in the center, at the bottom of the screen.

Practice Questions

After you have prepared the touch screen computer for the participant (steps 1-8 above) and are ready to train the participant on how to use the computer using the practice questions, tap the “PRACTICE QUESTIONS” button to begin the practice questions. Refer to the ACASI training script in section 7-5 of this manual to begin the ACASI training session. You may want or need to review the practice questions multiple times with each participant during the training/practice session. One option is to go over the first practice question without earphones so as to provide guidance and explanation to the participant.

Sit next to the participant while she answers the practice questions, which provide examples for the participant of the question types she will encounter during the actual questionnaires. They are as follows:
1. Are you a female? This is a yes/no question which requires the participant to choose either a black box or a red box.

2. How many children have you given birth to who were alive at birth? This type of question requires the participant to click on a number keypad to choose her response.

3. What is your age? This is a multiple choice question which gives the participant four color-coded options.
4. When was the last time you went to the market? This is a multiple choice question which gives the participant five color-coded options.

5. How difficult is it for you to get to the market? This is a multiple choice question which gives the participant five color-coded options, each option corresponding to a degree on a scale.

6. How did you get to the clinic today? This is a multiple choice question which gives the participant six number-coded options.
The text of each question will appear on the computer screen in the language that is selected during the administrative setup and will be accompanied by an audio recording of the questions that the participant will hear through the headphones. The participant will need to provide the correct answer to each question in order to move to the next question.

Please note: the responses to the practice questions are not stored.

Once the participant has answered the practice questions, there will be two options (see Figure 7-11):

1) You can have the participants repeat the practice questions by tapping the "REPEAT PRACTICE QUESTIONS" button.

Select this option if you think the participant needs more practice before beginning the HOPE ACASI interview.

2) You can have the participant proceed to the HOPE ACASI interview questions by tapping the “BEGIN QUESTIONNAIRE” button.

Select this option if you think the participant is ready to proceed to the actual HOPE ACASI interview questions. Before proceeding, one additional guidance point to explain to the participant is that while she hears some of the longer audio files which introduce sets of related questions, she will see a simple graphic such as the one shown in Figure 7-12 or will have the text displayed on the screen:

Once the participant has completed the practice questions and begins the HOPE ACASI interview, you should leave the room. You should however, wait outside the interview room so that you are available should the participant have any questions or problems.

Exiting the ACASI Program

At any time, you may terminate the interview application by double tapping or double clicking on the top left corner of the screen where you see a small white square with a black border. A gray box will pop up, asking if you would like to exit the survey. During the administrative setup, you may double tap on the MTN logo to exit the program.

Please note, each time an interview is completed, the computer will automatically reboot and take you back to the initial login screen.

Things to Keep in Mind
• If a participant is willing to use ACASI but cannot because she lacks numerical literacy or is otherwise unable to correctly use ACASI after several attempts with the practice questions, do not have her complete the ACASI Questionnaire. The decision to not do the ACASI interview is at the discretion of the site staff/investigator. Document in the participant’s chart notes that she is unable to complete the questionnaire, and specify the reason(s). On the ACASI Tracking CRF, indicate that the participant did not complete the specified ACASI Questionnaire and record the reason the questionnaire was not completed in the text box provided.

• There are internal checks built into some of the practice questions; this is by design. The responses must agree with each other, specifically for questions regarding the participant’s sex, number of children, and mode of transportation. She will be prompted to try the question again if the answer she gives during the practice questions does not agree with the answers that you entered in the administrative section.

• If there are any program or computer failures during an interview, please write down the question number and the context in which the error occurred. As much information as possible about the situation that brought about the error would be useful for correcting the problem. If the error causes the interview program to stop, you should exit the program and restart it.

• If the interview that is terminated is only partially completed, the participant will need to start from the beginning with a new interview. The interview program will allow one study participant to complete the interview more than once, but the data from each interview will be saved separately.

• You may need to respond to specific questions the participant may have about how to enter their response or about the interview questions. To answer questions related to how to use ACASI, please refer to the guide for administrators on how to use ACASI (Section 7-6).

• As you remove the SD card from the touch screen laptop, you might accidentally move the gray tab on the left side of the card to the “locked” position. Before inserting the SD card into the Data Manager laptop, you must be sure that the card is unlocked by moving the gray tab back up to the unlocked position (Figure 7-13).

![Figure 7-13](image_url)
6 ACASI Training Script

Sit next to the participant and use the following training script to show the participant how to use the touchscreen computer, headphones and stylus.

(Local language training scripts are available online as separate documents)

<table>
<thead>
<tr>
<th>Main topics</th>
<th>Content</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTRODUCE SELF AND INTERVIEW</td>
<td>Hello, my name is _______. I am going to set up the computer for your interview and show you how it works. If you have any questions at any time, please feel free to stop me and ask. We will work together until you feel comfortable using the computer on your own.</td>
</tr>
<tr>
<td>EXPLAIN CONFIDENTIALITY</td>
<td>I want you to know that your answers to these questions are confidential. That means your personal information will be kept private and will not be discussed with anyone else.</td>
</tr>
<tr>
<td>EXPLAIN AND DEMONSTRATE HEADPHONES</td>
<td>The interview questions are recorded on the computer, so instead of me asking you the questions, you will hear them through the headphones. You place the headphones on your head like this [show ppt]. You can adjust the loudness of the voice you hear by turning this knob. [show ppt]. Do you have any questions?</td>
</tr>
<tr>
<td>EXPLAIN HOW THE PARTICIPANT WILL HEAR AND SEE THE QUESTIONS</td>
<td>You will hear each question and the possible responses on your headphones. If you would like to answer the question before you have heard all of the possible responses, please feel free to do so. However, we ask you to take as much time as you need to think about the best answer to fit your situation. What you hear on the headphones is not “live” [explain more if needed] so you should not answer the questions out loud. Instead, I will show you how to answer the questions using this stylus [show the participant how to use the stylus].</td>
</tr>
<tr>
<td>IF PARTICIPANT IS LITERATE PLEASE ADD:</td>
<td>You can read the question at the same time, as it will also be displayed on the screen.</td>
</tr>
<tr>
<td>EXPLAIN AND DEMONSTRATE STYLUS</td>
<td>When you are asked a question, you will choose your answer by pressing the computer screen with the stylus. Press the screen lightly and as straight as possible. [show ppt]</td>
</tr>
<tr>
<td>EXPLAIN DIFFERENT WAYS TO RESPOND TO QUESTIONS:</td>
<td>Each question can have 2 to 6 possible responses. You select your response by pressing colored boxes, or a picture, or a box with a number in it.</td>
</tr>
<tr>
<td>COLORED BOXES</td>
<td>For example, if you are asked whether you are a female, there will be a red box next to “No” and a black box next to “Yes.” You would press the red box if you are male and the black box if you are female</td>
</tr>
<tr>
<td>NUMBERED BOXES</td>
<td>For other questions, you may press the box with the number corresponding to your answer for that question</td>
</tr>
<tr>
<td>----------------</td>
<td>--------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>CLEAR</td>
<td>If you press an incorrect numeric value on the number pad, you can press the CLEAR button to restart entering the correct value.</td>
</tr>
<tr>
<td>EXPLAIN HOW TO ANSWER COUNT QUESTIONS WITH THE NUMBER PAD</td>
<td>For questions that prompt you to enter a value on the number pad, enter the value by pressing the corresponding number.</td>
</tr>
<tr>
<td>EXPLAIN HOW TO REPEAT A QUESTION</td>
<td>If you need to hear a question again, you may press the picture of the woman at the top of the screen with the stylus.</td>
</tr>
<tr>
<td>EXPLAIN HOW TO RETURN TO A PREVIOUS QUESTION</td>
<td>If you want to go back to the previous question, press the big white box at the bottom left of the computer.</td>
</tr>
<tr>
<td>PRACTICE QUESTION [PQ1] WITHOUT HEADPHONES</td>
<td>Let’s try some practice questions together – the first question asks whether you are a woman. Press the black box once to confirm that you are. After you have answered the question, the computer will tell you to press the green box to go to the next question.</td>
</tr>
<tr>
<td>PRACTICE QUESTION [PQ2] WITHOUT HEADPHONES</td>
<td>Let’s try another practice question. This question asks how many children you have that were born alive. Here, you press the box corresponding to the number of children you had. For example, if you had two children, you would press the number 2 box. After you have selected the correct number, the computer will tell you to press the green box to go to the next question.</td>
</tr>
<tr>
<td>PRACTICE QUESTION [PQ3] WITHOUT HEADPHONES</td>
<td>Let’s try another practice question. This question asks your age and instructs you which color box to choose that includes your age in the range. [It may be helpful to give an example – “if you are 30 years old, you would press the red box because your age falls between 25 and 34 years.”] Please press the correct answer now. Do you understand?</td>
</tr>
<tr>
<td>PRACTICE QUESTION [PQ4] WITHOUT HEADPHONES</td>
<td>Here is another practice question. This question asks about the last time you went to the market. Here, you press the box corresponding to the correct day. For example, if you last went to the market 5 days ago, you will press the yellow box for “4-7 days ago”. After you have selected the correct colored box, the computer will tell you to press the green box to go to the next question.</td>
</tr>
<tr>
<td>PRACTICE QUESTION [PQ5] WITHOUT HEADPHONES</td>
<td>Here is another practice question. This question asks how difficult it is for you to get to the market. Here, you press the box corresponding to how difficult it is for you to get to the market. For example, if it is very difficult for you to get to the market, you will press the black box.</td>
</tr>
</tbody>
</table>
After you have selected the correct colored box, the computer will tell you to press the green box to go to the next question.

<table>
<thead>
<tr>
<th>PRACTICE QUESTION [PQ6] WITHOUT HEADPHONES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Here is another/the last practice question. This question asks how you got to the clinic today. Here, you press the box with the number that corresponds to your answer. For example, if you came to the clinic by bus today, you would press the number 2 box. After you have selected the correct number, the computer will tell you to press the green box to go to the next question.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>REPEAT PRACTICE QUESTIONS WITH HEADPHONES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Let’s try going through these practice questions again but this time with the headphones.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>PAUSE SURVEY</th>
</tr>
</thead>
<tbody>
<tr>
<td>You have done very well in learning how to use the computer and headphones. I think you are ready to now answer the interview questions on your own. Do you have any questions before you proceed? [Discuss as needed.] Now I’m going to leave the room so you can answer the questions in private. I will be sitting just outside the room if you have any questions. Please remember to take off your headphones and come get me when you are finished or if you have any questions during the interview.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>REVIEW DEFINITIONS OF VAGINAL AND ANAL SEX</th>
</tr>
</thead>
<tbody>
<tr>
<td>You will be asked very specific questions about sex and the kind of sex that you have. You will be reminded of these definitions during the survey but I would like to explain them to you before you begin in case you have any questions. By primary sex partner we mean a man you have sex with on a regular basis, or who is your boyfriend or husband, or who you consider to be your main partner. Vaginal sex is when a man puts his penis inside your vagina. Anal sex is when a man puts his penis inside your anus. Note to staff: With regards to terms such as “vagina”, “penis,” “anal/anus,” and “partner” that may vary in different cultures and languages, please use the term(s) most appropriate to the local population when reviewing these definitions with participants.</td>
</tr>
</tbody>
</table>

| LEAVE ROOM WHILE PARTICIPANT COMPLETES INTERVIEW. |

7.7 Guide for Administrators: Instructions on how to use ACASI
1. If the participant has a question about **how to proceed from one question to the next** say “After answering each question, to go to the next question, press the big green box at the bottom right of the screen.”

2. If the participant has a question about **how to hear a question again** say “If you want to hear a question again, press the picture of the woman at the top of the screen.”

3. If the participant has a question about **how to go back to the previous question** say “If you want to go back to the previous question, press the big white box at the bottom left of the screen.”

If the participant asks for guidance on how to answer a question, it is important to guide her on how to answer the question using hypothetical answers. Do not ask her what answer she would like to enter. Below are specific instructions on how to answer participant’s questions on how to answer a particular question.

4. “After you have answered, press the big green box at the bottom right of the screen to go to the next question.”

5. If the participant has a question about **how to answer a Yes/No question** say “If your answer is ‘yes’, press the black box. If your answer is ‘no’, press the red box.”

6. If the participant has a question about **how to answer a question with multiple colored boxes** say “If you want to hear the instructions again, press the picture of the woman at the top of the screen. Listen to the choices that the computer gives you and press the colored box that corresponds with your answer. For example, for the practice question that asked you how many siblings you have, if you have no siblings you would press the black box. If you have one sibling, you would press the red box. If you have two siblings, you would press the blue box. If you have three siblings, you would press the yellow box. If you have four or more siblings, you would press the white box.”

7. If the participant has a question about **how to answer a question with numbered responses** say “If you want to hear the instructions again, press the picture of the woman at the top of the screen. Listen to the choices that the computer gives you and press the box corresponding to the number of times that you did what the computer is asking. For example, if your answer is two, you would press the number two box.

8. If the participant has a question regarding **count questions with the number pad**, say, “If you want to hear the instructions again, press the picture of the woman at the top of the screen. To select your response, tap the number(s) that corresponds with the answer you wish to select. For example, if your answer is 17, tap the 1 and then the 7. If you accidentally press the incorrect number, press the yellow clear button to restart entering the correct response.”
7.8 Transferring Data from Touch Screen Computers to Designated ACASI Data Manager Computer

At the end of each workday on which at least one ACASI interview is administered, the ACASI Computer data manager will transfer data from the touch screen computers to the ACASI Data Manager laptop computer. The Data Manager laptop is the only one provided to the site that does NOT twist open, as the touch screen laptops do. Please note that all data merged onto the Data Manager computer is cumulative, that is the data is added to an already existing database. In the event that duplicate ACASI interviews are done, the data will be merged and not overwrite existing data. Each tablet has its own SD card and unique data which should not be mixed before they are merged. Please note: Each site should only merge data to their assigned Data Manager Computer.

1. Remove the 2GB Secure Digital storage device (SD card) from each touch-screen laptop computer. Please note: Each SD card is labeled with a unique number that matches one of the laptops and must always go back into the laptop with the corresponding label.

2. If the ACASI Data Manager computer is not already turned on, turn it on and enter the secure power-on password.

3. If the ACASI Data Manager computer is turned on and you are logged in, log out by pressing Start > Shut Down and then choosing log off username.

4. Log back into the ACASI Data Manager computer as the computer administrator, using your assigned user name and password.

5. Insert the SD card into the SD card slot on the left side (Lenovo units) or right side (HP units) of the laptop.

6. Double click on the ACASI data manager icon, which is located on the Windows Desktop. You will see the dialog box shown in Figure 7-14 with six (6) buttons.
7. Click the first button in the Data Manager Dialog box, which reads “Merge data from SD card to ACASI database.” This will copy the new data from the SD card into the ACASI database maintained on the laptop, which is located in the C:\ACASI\DATA folder. After the data are successfully transferred, the transfer program will delete the data from the SD card.

Note: If you have not inserted the correct SD card, you will see the error message below (Figure 7-15):

![Figure 7-15](image)

Also note that as you remove the SD card from the touch screen laptop, you might inadvertently move the gray tab on the left side of the card to the “locked” position. Before inserting the SD card into the Data Manager laptop, you must be sure that the card is unlocked by moving the gray tab back up to the unlocked position. If you have locked the SD card before inserting it into the Data Manager laptop, you will see this error message in Figure 7-7.

In Figure 7-17 (below), you can see how the card should look when it is unlocked.

![Figure 7-17](image)

8. After the data are successfully transferred, the transfer program will delete the data from the SD card.
9. If the data are not successfully transferred, please note the error and email a description of the problem to MTN025acasisupport@mtntopshiv.org

10. Remove the SD card from the data manager laptop and insert it in the corresponding touch-screen computer immediately to make sure they are kept together.

After completing the data transfer from all the touch-screen computers that completed ACASI questionnaires to the data manager computer, then proceed to uploading the data to the ACASI database, and backing up the data to your assigned USB key.

7.9 Uploading ACASI Data to the SCHARP Atlas Portal

At the end of each workday on which at least one ACASI interview is administered, after transferring data from the touch screen ACASI computers to the designated data manager computer, the ACASI Computer data manager will upload the ACASI database to the MTN SDMC (i.e. SCHARP) via the ATLAS portal.

1. If the data manager program is not open, double click on the ACASI data manager icon on the Windows Desktop.

2. You will see the Data Manager dialog box shown in Figure 7-18.

3. Click on the second button in the Data Manager dialog box, which reads “Upload ACASI database to ATLAS at SCHARP.”

4. The files to be uploaded will be date stamped with the current date and will be in the following format:

   acasi_MTN025-DDMMYYYY-HHMMSS-###.ZIP

   Where DDMMYYYY is the day month and year, HHMMSS is the time in hours minutes and seconds, and # is the Data Manager laptop number. For example:

   acasi_MTN025-10062007-19311500-DataManagerPC1.ZIP

5. With the computer connected to the Internet, do the following:

   a. Go to http://atlas.scharp.org and click on the MTN button on the front page. You will be asked to agree to the terms of use by checking a box and then clicking the AGREE button. Click on 025 in the left hand navigation bar. At this point you will need to sign in to access the ACASI section of the website. NOTE: Please be sure to not select other protocols that you may have access for uploading ACASI data, for MTN-025 you should click on the 025 in the left dropdown navigation bar.

   b. Alternatively, you can browse directly to https://atlas.scharp.org/cpas/Project/MTN/025/begin.view and sign in with your Atlas email
and password. It may be helpful to bookmark this page in your web browser so you can return to it easily.

c. Click the word **ACASI** on the navigation menu, and then click on the appropriate site.

d. Click the 'Upload Files’ icon on the lower portion of the page.

e. Browse to the file to be uploaded on the data manager computer. You will only need to upload the most recent file each day, as both new questionnaires and any changes will be added to that file cumulatively.

f. Click the 'Submit' button.

You should now see the file in the upload area. You may refer to this page to view a chronological list of recent uploads and confirm file upload. You can sort on any column, much like in Excel or Atlas databases, by clicking the column header or the arrow to its right:

Please Note: The file name must be unique for each upload and the maximum upload size is 250MB.

For any support needs related to the data upload process, please send an e-mail to MTN025ACASISupport@mtnstophshiv.org.

For any Atlas technical issues and for questions or problems related to Atlas web sign in, please e-mail atlas@scharp.org.

Refresh: This will refresh the contents of the ‘Files’ module. This is similar to hitting ‘refresh’ on your browser.
7.10 Backing Up the ACASI Database

At the end of each workday on which at least one ACASI interview is administered, after transferring data from touch screen ACASI computers to the designated ACASI laptop and uploading the ACASI database to the MTN SDMC (i.e. SCHARP) via the ATLAS portal, the ACASI Computer data manager will back up the ACASI database and Windows Event Logs to the assigned portable data storage device (USB key).

1. If the ACASI laptop is not already turned on, turn it on and enter the secure power-on password.
2. If logged in, log out of the laptop by pressing Start > Shut Down and then choosing log off *username*.
3. Log back into the laptop as an administrator, using your assigned user name and password.
4. Insert the assigned USB key into one of the USB ports on the left side of the laptop.
5. Double click on the ACASI data manager icon located on the Windows Desktop. You will see the dialog box shown in Figure 7-19 with six (6) buttons.
6. Click the third button in the Data Manager dialog box, which reads “Backup ACASI database to USB key.”
7. A pop-up window will confirm that the backup has been successfully completed and a window will open up which displays the files that have just been backed up.
8. Remove the memory key by right clicking on this icon on the task bar and then left clicking on Safely Remove Hardware. Click USB Mass Storage Device, and then click Stop. Click USB Mass Storage Device again, and then click OK, and then Close. You will see a message pop up on the task bar, telling you that it is safe to remove the hardware.
9. The USB backup key should be stored securely and in a dry location, in a locked cabinet.
7.11 Technical Notes on Data Backups

The source ACASI data folder is C:\ACASI\DATA. This is the location in which the ACASI Access database resides.

The ACASI backup program utilizes the compression utility WinZip to ensure optimum drive space utilization. A backup is performed on the following databases and files:

1. The ACASI database – ACASI_MTN025.mdb
2. Windows computer System Event Log
3. Windows computer Application Event Log
4. Windows computer Security Event Log
5. System.mdw
6. RespondentResponses.xml

The backup program creates unique backup files of each database each time a backup is run. This is done to prevent overwriting backup files. Each backup file will be date and time stamped within the backup filename. Additionally, a unique backup name is created for each laptop computer. If you have any problem with the backup procedure or anything does not work as indicated here, please contact technical support at MTN025acasisupport@mtnstopshiv.org.

```
{NAME} {DATE} {TIME} {COMPUTER NAME}
```

**Example Backup Filename:** acasi_025-10062007-19311500-acasi-mtn-v-lt1.ZIP
**Example Backup Filename:** AppEvent-10062007-19311500-acasi-mtn-v-lt1.ZIP
**Example Backup Filename:** SecEvent-10062007-19311500-acasi-mtn-v-lt1.ZIP
**Example Backup Filename:** SysEvent-10062007-19311500-acasi-mtn-v-lt1.ZIP
**Example Backup Filename:** ACASI_xml-10062007-19311500-acasi-mtn-v-lt1.ZIP

The backup filename will indicate the database file that was backed up, followed by the date, time, and assigned ACASI computer name.

Each backup file is compressed and encrypted with the assigned password “ptw472”.

When a merge from the SD card is done, the compressed files are stored in date-stamped folders in the C:\acasi\backup directory on the hard drive. The purpose of the USB key is to add an extra level of safety in case the hard drive crashes.

*If the automated backup to the USB key does not function properly, please follow the steps below to perform a manual backup. You can simply copy the backup files just like you would with any other file.*

1. Open Windows Explorer or My Computer.
2. Navigate to the C:\acasi\backup directory.
3. Select the current date’s folder. For example, the files for April 9, 2008 will be in a folder labeled 04092008.
4. Select the folder then copy and paste it to the USB key. The drive letter of the key will most likely be E:
7.12 Correcting Key Data in the ACASI Database

The following data are considered “key data” in the ACASI database: PTID, visit code and visit date. If the MTN SDMC (i.e. SCHARP) identifies that any changes to these key data may be needed, the steps below will be followed:

1. The MTN SDMC will contact both the site and ACASI technical staff at the Population Council, Samir Souidi (ssouidi@popcouncil.org).

2. Authorized staff at the site will log onto the ACASI laptop as an administrator, using their assigned user name and password, and then complete the following:

3. Double click on the **ACASI Data Manager** icon located on the Windows Desktop.

4. You will then see a Data Manager dialog box with six buttons on it (Figure 7-20).

5. Click the fourth button in the Data Manager dialog box which reads “Correct Participant ID, Visit Date.”

6. Enter your assigned User name and password.

7. Enter the Participant ID number and then click the Search button. The format for the PTID is XXX-XXXXXX.

If you do not use the correct PTID format, you will see this message:
8. After the PTID is correctly entered, you will be presented with a list of questionnaires that have been done for the entered PTID. Based on the information provided to you from SCHARP (PTID, Visit Date, etc.), you will need to select the correct record from the list provided to you. The ID field is a unique internal ACASI identifier which is created because multiple ACASI questionnaires can be done for each PTID. Click “Select” on the record you wish to update, even if there is only one match for that PTID.

9. Once you choose a record by clicking Select, you will see the confirmation dialog box below.
10. Click the drop-down arrow to the right of the Field list to choose which field you need to correct (Participant ID, Visit Date or Duplicate).

11. Press the Tab key on the computer keyboard to display the existing value.
12. Enter the new (correct) value in the “New value” field.
   - If you are correcting the Participant ID or Visit Date, you must explain why the change is being made in the comment area.
   - If you are correcting a Duplicate entry, choose the reason for your change from the drop-down menu (next page, top Figure). If you choose “Other, specify”, you must enter your reason in the Comment box (next page, center Figure). If you do not enter a comment, you will see the error message at the bottom of this page.
13. If you choose to correct the Visit Date, you will see the current date appear as the default. You will need to click on the drop-down arrow to the right of that date to view a calendar and then click on the date you want, **even if the default date is correct**. A value must appear in the “New Value” field in order to be saved by the system.

![Calendar Image](image-url)

Click here to choose the date.

14. Click the Save button if your entry is correct or the Clear button if you need to correct it.

15. After saving the correct value, click the Exit button.

16. The spreadsheet should be emailed to: MTN025ACASISupport@mtnstopshiv.org.

17. **Reference Appendix 7-5 on steps for correcting duplicate surveys**

### 7.13 Run t-SQL updates

This option should not be used unless directed to do so by the Population Council IT team while troubleshooting issues.

### 7.14 Restoring On-Site ACASI Data

Should a situation arise in which ACASI data needs to be restored to the designated on-site ACASI laptop computer, please email (MTN025acasisupport@mtnstopshiv.org) to request written instructions to complete this process.
Set-Up

1. Power on password is \textit{dvd15}
2. Account credentials are:
   - Username: \textit{acuser}
   - Password: \textit{color93}
3. Plug headphone into green round port on right side of laptop
4. Plug USB mouse into USB port on right-side of laptop (USB Mouse to assist ACASI Administrators with administrative section of ACASI. \textit{Note: If stylus causes difficulties, participant can also use mouse to complete ACASI questionnaire})

Administrator ID’s assigned by country:

- 100-275 – MRC
- 300-325 – Cape Town
- 326-349 – WRHI
- 350-375 – Uganda
- 376-399 – Blantyre
- 400-475 – Zimbabwe
- 476-499 – Lilongwe
- 526-550 – eThekwini

Test PTIDs (for staff to train and retrain practicing ACASI)

999-XXXXXX

Any 9-digit numeric test PTID that starts with “999” as the first 3 digits can be used to enter and generate ACASI test data. The designated “999” represents a dummy 3-digit site number portion so only “999” should be used for the first 3 digits. There is no restriction on the remaining six digits within the test PTID.

\textbf{Touch-screen Swivel}

After completing the Administrative section of ACASI interview, ACASI Administrators should swivel the screen of the laptop so the participant does not use keyboard.
Section Appendix 7-2

ACASI Data Manager Cheat Sheet

1. **Transfer and merge all SD Card data to ACASI database.**
   
   A. Start laptop and log in as bond007.
   
   B. On the desktop, double click to start the ACASI Data Manager.
   
   C. For each Touch-screen computer:
      
      i. Remove the SD Card from the side of the computer. Press the SD Card down *lightly* and it should pop out.
      
      ii. Insert the SD Card into the Data Manager laptop; its card reader is located on the left side of the laptop.
      
      iii. Count from one to ten.
      
      iv. Click the “Merge data…” button.

2. **Upload ACASI-025 backup zip file to atlas.scharp.org.**
   
   Once all the data from the SD Cards have been successfully merged to the ACASI database:
   
   A. Click the upload button on the ACASI Data Manager dialog box.
   
   B. Internet Explorer will open at the atlas.scharp.org upload website. Sign in to atlas.scharp.org using your email address and Atlas password.
   
   C. Click the 025 folder and [insert site] folder.
   
   D. Click the “Upload file” link. You will be prompted to browse for the ACASI_025_DB_XXXXXX.zip file.
   
   E. Click the submit button to upload the zip file to atlas.
   
   F. Verify the file backups.

3. **Backup the ACASI database, xml, and event log zip files to the USB key.**
   
   A. Insert USB Key into laptop. USB slot is located at the back of the laptop (or on the side).
   
   B. Click the “Backup ACASI database to USB key” button.
   
   C. Windows Explorer will open to the USB key backup folder.
   
   D. Verify the file backups.
Section Appendix 7-3

ACASI Step by Step

1. Introduce yourself, welcome the participant and make her feel as comfortable as possible

2. Explain ACASI procedure
   o Stress that we are using ACASI to give as much privacy as possible
   o Emphasize that responses are kept confidential
   o Tell participant what to expect during the ACASI interview

3. Enter information in Administrative Section

<table>
<thead>
<tr>
<th>Type Administrator ID</th>
<th>administrative information needed here</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select the Questionnaire</td>
<td></td>
</tr>
<tr>
<td>Type Participant ID number (PTID)</td>
<td>Confirm by entering it again</td>
</tr>
<tr>
<td>Visit date</td>
<td>Confirm by selecting day, month, year from drop-down menu</td>
</tr>
<tr>
<td>Questionnaire language</td>
<td>Select one of thirteen languages</td>
</tr>
<tr>
<td>Participant’s # of children born alive</td>
<td>Select from drop-down menu per her self-report at ACASI set up</td>
</tr>
<tr>
<td>Participant’s age</td>
<td>Select from drop-down menu per her self-report at ACASI set up</td>
</tr>
<tr>
<td>Last time Participant went to market</td>
<td>Select from drop-down menu per her self-report at ACASI set up</td>
</tr>
<tr>
<td>Participant’s level of difficulty in getting to market</td>
<td>Select from drop-down menu per her self-report at ACASI set up</td>
</tr>
<tr>
<td>Mode of transportation used to get to the clinic</td>
<td>Select from drop-down menu per her self-report at ACASI set up</td>
</tr>
</tbody>
</table>

4. Swivel the screen of the laptop towards the participant

5. Demonstrate use of touch-screen computer, headphones, stylus

6. Administer Practice Questions: six questions to be completed by participant with guidance of ACASI administrator
   • Explain different ways to answer questions:
     ▪ COLORED SQUARES
     ▪ DIAL PAD
     ▪ NUMBERED BOXES
   • Explain how to check that her answer was “recorded” (blue highlight for categorical responses; correct number in box for count responses)
   • Explain how to answer count questions
   • Explain how to repeat a question and/or move on to the next question
   • Explain how to return to a previous question (can only go back ONE question to change answer)
   • Explain how to skip a question (only to be used if she refuses to answer)
   • Explain how to change a response (e.g. from “yes” to “no” )
   • Repeat Practice Questions again if participant is struggling with use of computer

7. Administer ACASI Questionnaire/Survey: to be completed by Participant
• Ask if participant has any questions before proceeding.
• Tell her you will leave the room to give her privacy.
• Tell her you will be sitting just outside the room if she has any questions.
• Remind her to take off the headphones and come get you when she is finished or if she has any questions during the interview.
• Leave the interview room and wait outside the room.

8. When the ACASI is finished, thank the participant for her time and effort in answering the questions.
   • Make sure she returns the stylus or leaves it with the touch screen computer.

9. For ACASI questions or concerns, please email the following:
   mtn025acasisupport@mtnstopshiv.org
Section Appendix 7-4

Hardware and Software Recording Requirements

The following items are required to perform the required recordings of questions for the ACASI MTN-025 study:

1. Personal computer with following hardware qualities
   a. Sound capability, either via integrated audio soundcard or integrated audio
   b. One Microphone Port In (Audio In)
   c. One Headphone Port Line Out (Audio Out)
   d. At least 100 MB of free hard disk space (for audio file storage)
   e. You may use one of the ACASI touch screen laptops to record the audio files

2. Windows based operating system, either Windows XP or Windows 7. Note: if you are recording the audio files on a Windows 7 laptop, you will need to use Audacity rather than Sound Recorder.

3. Audacity program or Windows-based Sound Recorder utility (generally installed by default with Windows operating system)

4. PC-Based headset with microphone with following qualities (strongly recommended, rather than using the laptop’s built-in microphone).
   a. In-line and microphone volume control
   b. Headphone frequency range of 20 Hz to 20 KHz
   c. Microphone frequency range of 100 Hz to 10 KHz
   d. Soft foam ear pads
   e. One recommended model is the Altec Lansing AHS322 headset
   f. Make sure that the microphone and headphone plugs match the pictures or icons on the laptop jacks.

   When you plug in the headphones, you may see an “Audio System Event” dialog box (at right) asking you for a "supported function". Make sure that Microphone is selected and then click the OK button.

Recording Environment

In order to ensure the best recordings as possible, please do the following:

1. Select a quiet location. It is recommended that recording be performed in a private room, or an area that is walled off from others.
2. Ensure the equipment is set up; this includes the headphone in the proper position.
3. Read the audio script in a calm but assertive voice.
4. Note that over time you may get tired, so it would be good to take breaks to ensure an effective creation of the audio files.
5. Also, please keep in mind:
   - **underlined words** are emphasized, but not strongly emphasized
   - slight pauses follow commas
   - longer pauses are specified in brackets, e.g., [3 second delay]
   - the recordings should be clear and understandable
   - the reading of the questions while recording should be at a moderate pace

There are two different programs that can be used to create the audio files. We have found that Audacity is more flexible and user friendly. In order to run Audacity, double click on its icon on your desktop -

**Using Audacity**

When Audacity opens, make sure that the display reads External Mic (for microphone), rather than Internal Mic or Line In; it should be selected by default.

![Audacity interface](image)

When you are ready to make your first recording, follow the steps below.

**Recording the Audio Files**

1. Sit down comfortably at the computer where the recordings will be made.
2. Place the headset on your head and position the microphone a few inches away from your mouth.
3. Take several deep breathes to relax your voice and remember to speak clearly and assertively.
4. Click the red circle button to start the recording and say “This is a test recording – 1-2-3-”
5. Click the yellow square button to stop the recording.
6. Go to the File menu and choose “Export As Wav” to save your file. Enter ACASITEST as the name of this test file and save it in any convenient location, such as My Documents or the Desktop.

7. To play back the recording, press the green arrow/triangle -
   a. Play the test recording several times to ensure the quality is good and there is no beginning or ending noise.
   b. If the sound quality is not adequate, try adjusting the volume on the headset itself and then play the test audio recording again.
   c. If the sound quality is still not adequate, return to the “Create a Test Recording” section above and re-attempt the recording. You can delete the first version of the recording by clicking the black ‘X’ at the top left corner of the sound “image”.

Some possible ways to improve quality are:
   • Adjust the position of the microphone.
   • Increase the volume on the microphone.
   • Ensure the connections from the headset are secure into the computer.
   • Record in a private and or quiet location.

8. Once you have successfully created a test sound file, you will be ready to record the actual ACASI script. Follow the steps above for creating a test file, but use the naming conventions below. The files should be saved into the c: \audiofiles folder. The audio files will ultimately be copied to the handheld computers and kept in a centralized SharePoint project website.

**Naming Conventions for Audio Files**

The naming convention of the audio files takes the form of:

1. question identifier (in bold)
2. 3-letter language identifier
   - eng (English version)
   - chi (Chichewa version)
   - zul (Zulu version)
   - xho (Xhosa version)
   - sho (Shona version)
   - lug (Luganda version)
3. the “.wav” extension

Example: For the first introduction (Intro1) and played before the practice question:
   filename: intro1_eng.wav (English version)
             intro1_chi.wav (Chichewa version)

Example: For the Administration Questions
   filename: a1_eng.wav (English version)
a1_ch1.wav (Chichewa version)

Example: For the Main Survey Questions
filename: Q1_eng.wav (English version)
Q1_ch1.wav (Chichewa version)

*Using Windows Sound Recorder (only on a Windows XP laptop)*

1. Click Start > Programs > Accessories > Entertainment > Sound Recorder. The dialog box below will appear:

![Sound Recorder](image)

2. Click the red circle \(\text{Red Circle}\) to start the recording and say “This is a test recording – 1 – 2 - 3 - “

3. Click the black rectangle \(\text{Black Rectangle}\) to stop the recording.

4. Click File > Save As… in the File name text box, and enter ACASITEST. Ensure the “Save as” type is set To Sounds (*.wav) and click Save. Remember the specific location where you saved the file.

5. Click the black right arrow \(\text{Play Button}\) to play the test recording. Play it several times to ensure the quality is good and there is no beginning or ending noise.

6. If the sound quality is not adequate, try to adjust the volume on the headset itself and play the test audio recording again.

7. If the sound quality is still not adequate, return to the “Create a Test Recording” section above and re-attempt the recording. Some possible items to adjust to improve quality are:
   a. Adjust the position of the microphone
   b. Increase the volume on the microphone
   c. Ensure the connections from the headset are secure into the computer
   d. Record in a private and or quiet location.

9. Once you have successfully created a test sound file, you will be ready to record the actual ACASI script. Follow the steps above for creating a test file, but use the naming conventions on pages 3 and 4 for the actual files.

   The files should be saved into the `c:\audiofiles` folder. The audio files will ultimately be copied to the touch-screen computers and kept in a centralized SharePoint project website.
Section Appendix 7-5
Steps for correcting duplicate surveys

I. Correcting Duplicate entry:

a. If you are correcting a Duplicate entry, choose the reason for your change from the drop-down menu (next figure). If you choose “Other, specify”, you must enter your reason in the Comment box (next page, center Figure). If you do not enter a comment, you will see the error message at the bottom of this page.

b. Please follow these steps:
   1. Select “Duplicate field” in the Field label
   2. Select one of the reasons to justify this duplication:
      1. Administered the wrong questionnaire
      2. Administered a questionnaire at a visit when it was not required
      3. Equipment or software malfunctioned
      4. Restarted questionnaire after delay
      5. Restarted questionnaire after participant terminated it
      6. Other, specify
   3. If “Other specify” selected, you must enter comments in the comment section
   4. In the comment section, please do not use Tab on the text, or copy text from word document to the filed. Please enter your comments directly to the filed.
II. Click the Save button if your entry is correct or the Clear button if you need to correct it.

III. After saving the correct value, click the Exit button.
