MTN-003D Stage 2
IDI Visit Procedures

Miriam Hartmann, MPH
Women’s Global Health Imperative
RTI International
San Francisco, CA, USA
IDI Visit Checklist

- Step-by-step guide to visit procedures
- Each line to be completed (or write “NA”)
IDI Preparation

- Time confirmed with participant
- Appropriate space for interview identified and reserved
- Current versions of ICF, discussion guide, other tools (e.g. PK visuals, theme cards, etc.) and checklists
- Audio-recorder charged, has batteries, and tested that day for functionality
- Verify participant status (i.e. PK results, HIV status, study product group)
Outline of Visit Procedures

- Confirm identity
- Informed consent
- Confirm eligibility
- Demographic Information (DEM) form
- Begin IDI
- Fill out/note PK Response for/on Participant Status Form (PSF)
- Complete IDI
- Complete PSF
IDI Procedures: the Beginning

- Greet participant
- Confirm identity
  - How will this be done?
- Explain, conduct and document written informed consent
- Confirm eligibility criteria
  - What needs to be verified? How will this be done?
Demographic (DEM) Form

- No changes from Stage 1
- Interviewer-administered prior to IDI
- Available in English and local language
- 30 questions:
  - Some new information
  - Some verbatim to VOICE CRF data to record updates/changes since VOICE data captured
DEM Form

- CRF:
  - Complete all header and footer items: PTID, date, initials and date
  - Follow GCP in completing each question and making corrections (initial and date)
  - Use blue or black ink
  - Question guide on the reverse side
MTN-003D Demographic Information Form (DEM)

**INTERVIEWER READS:** The following are some basic questions regarding your background to help us know what type of people participated in the discussion for this study. All the information you provide will be kept confidential and will not be shared with anyone else besides the research study staff.

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>

</tr>
</tbody>
</table>
IDI Procedures: the Middle

- Interview will follow guide
  - Primary research *topics* numbered and appear in gray
  - Primary research *questions* in bold
  - Probes bulleted
- Notes to be taken on separate sheets of paper
  - Separate sheets must be labeled with PTID, date and staff initials
IDI Procedures: the Middle

- The guide is a guide, not a script. Interview should flow naturally and flexibly
  - Acceptable to jump around
  - Acceptable to probe on spontaneous, relevant issues
  - Acceptable to rephrase probes

- However…
  - Ensure primary research topics/questions are addressed
Conduct Sections A-B

Section A. Use the following talking points as a guide for IDI participants and during both the individual consent period and the group discussion for FGD participants.

1. **Impression of the VOICE Results**
   (For women from Stage 1: emphasize that we are still trying to understand VOICE, and that at the time when she was interviewed previously we did not have blood test results).

   **English:** We would like to understand why so many women in VOICE did not take their products consistently so we can design products that women can take and improve future studies for HIV prevention. Since YOU are the expert, please help us by explaining your experience in VOICE.

   **Translation:**

   Additional Probes (Get feedback on the following specific points):
   - Neither of the two tablets (Truvada or tenofovir) nor the gel were found to be effective in preventing HIV in VOICE.
   - When researchers looked at VOICE participants’ blood tests they found that a majority of the women in VOICE (this means thousands of women) never had any drug from the study products in their blood.
   - Because of these blood tests showing that women were not taking the products in VOICE, researchers could not determine if the products were protective against HIV.
   - There are several other studies that were conducted more or less at the same time as VOICE, in Africa and other parts of the world that indicated that the products are protective against HIV, when they are taken consistently as directed.

   Available tools: e.g. MTN press release, educational sheet for study results; local press clippings

Section B. Use the following talking points for IDI participants and during the individual consent period for FGD participants.

2. **Participant’s own PK results**
Capture Reaction to PK Results

- Record on PSF or make a note of the participant’s reaction
- If noted elsewhere during IDI, be familiar with response options on PSF

<table>
<thead>
<tr>
<th>9.</th>
<th>Record your assessment of the participant’s physical/emotional reaction upon hearing her PK results. <em>(Select all that apply)</em></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>□ 1 Anger                                                                  □ 1 Distress/ Unhappiness</td>
</tr>
<tr>
<td></td>
<td>□ 1 Fear                                                                   □ 1 Happiness</td>
</tr>
<tr>
<td></td>
<td>□ 1 Sadness                                                                □ 1 Surprise</td>
</tr>
<tr>
<td></td>
<td>□ 1 Disbelief                                                              □ 1 Other, specify:</td>
</tr>
</tbody>
</table>
## Conduct Section C

### Section C. Use the following talking points for IDI participants and FGD participants in the group discussion setting.

3. **Factors influencing adherence (spontaneously derived)**
   (Note the importance of eliciting all the reasons the participant spontaneously mentions as influencing adherence before probing on specific topics)

**English:**
- [For women with low drug detection:] *What are all the reasons you were not able to take your products?*
- [For women with high/inconsistent drug detection:] *the drug data show that you took the product [some of/ most of/ all of] the time prior to coming to the study visits... What are all the reasons you were able to [some of/ most of/ all of] the time, take your products?*

**Translation:**
- [For women with low drug detection:]
- [For women with high/inconsistent drug detection:]

4. **All other factors influencing adherence (probing topics)**
   - [For IDI participants]: Do key theme card exercise.
   - [For FGDs]: Use cards to facilitate conversations....

**Additional Probes:**
- [For women with low drug detection:]
  - What was happening (that influenced you not taking product)?
  - How did reasons for non-use change over time, or did the reasons stay the same?
- [For women with high/inconsistent drug detection:]
  - How much did the visit act as a reminder to take the products?
  - What situations or circumstances made it easier or more difficult to take the product daily?
  - What was happening (that influenced you taking product)?
## Conduct Section D [HIV+ Women]

### Section D. Use the following talking points for IDI participants who have seroconverted:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>8. Experience of product use and seroconversion</strong></td>
<td></td>
</tr>
</tbody>
</table>

**English:** If it’s okay with you, I’d like to talk more about your HIV sero-status… What in your view may have contributed to you getting HIV?

**Translation:**

**Additional Probes:**
- Was there any particular time or event where you think you may have gotten HIV?
- Have you had any recent changes in personal life, behaviors or circumstances that may have contributed to your getting HIV?
- What was your experience with taking the study product, both good and bad?
- What do you think about your participation in VOICE now, with all that happened to you?

**CLOSING:** Thank the participant for her invaluable contribution to the research and ask her if she has any questions or comments.
IDI Procedures: the End

- If participant is HIV negative, had “low drug detection” levels, and has been open about non-adherence] ask if she would be willing to join an FGD of her peers.

- Thank and reimburse participant
Social Harms Form

- Social harms related or unrelated to VOICE and/or MTN-003D may be mentioned during interview
- No changes to form or procedures from Stage 1
- Slides from Protocol Training on SHs available at: http://www.mtnstopshiv.org/node/4639
Post-Interview Procedures

1. Complete Participant Status Form (PSF)
2. Interviewers and note-takers: check recording and expand notes, if necessary
3. Review CRFs for completeness and clarity
4. Complete IDI Debrief Report template
PSFs for Enrolled IDI Participants

- Captures
  - MTN-003D PTID,
  - VOICE PTID,
  - Stage 1 and Stage 2 status,
  - Drug detection level and response to PK results,
  - Enrollment, interview and termination dates
  - Reason for termination

- Will differ for potential FGD sparks
Ex. 1: IDI Ppt Only

MTN-003D Stage 2 Participant Status Form (PSF)

Instructions: This form is to be completed for any MTN-003D participant who is considered for Stage 2 participation.

1. Complete VOICE PTID 321-78910-5

2. Was the participant enrolled in MTN-003D Stage 1? (If yes, PTID will remain the same as Stage 1)
   - Yes 1
   - No 2

3. Was the participant enrolled in MTN-003D Stage 2?
   - No 2
   - GO TO 12

4. Date of enrollment in MTN-003D Stage 2:
   - 20 SEP 13

5. Date MTN-003D Stage 2 IDI conducted (record date or check N/A):
   - 20 SEP 13 or N/A

6. Date MTN-003D Stage 2 FGD conducted (record date or check N/A):
   - N/A

7. FGD Participant Pseudonym:

8. What is the participant’s drug detection level classification (mark one)?
   - Low drug
   - Inconsistent drug
   - High drug
9. Record your assessment of the participant’s physical/emotional reaction upon hearing her PK results. *(Select all that apply)*

- ☐ Anger
- ☐ Distress/ Unhappiness
- ☐ Fear
- ☑ Happiness
- ☐ Sadness
- ☐ Surprise
- ☐ Disbelief
- ☐ Other, specify: ____________________________

10. Date of termination from MTN-003D Stage 2:

   20 SEP 13

   dd MMM yy

11. Reason for termination from MTN-003D Stage 2 *(mark one)*:

- ☑ Participant completed study
- ☐ Inappropriate enrollment
- ☐ Other, specify: ____________________________

   **END FORM**

12. Reason for non-enrollment in MTN-003D Stage 2 *(mark one)*:

- ☐ Did not give permission to be contacted
- ☐ Contacted, but refused participation, specify: ____________________________
- ☐ Scheduled three times, did not show
- ☐ Eligibility criteria not met, specify: ____________________________
- ☐ Did not provide written informed consent
- ☐ Other, specify: ____________________________

Comments:
Participant scheduled on 23/SEP/13 did not show. Rescheduled for 25/SEP/13, did not show. Rescheduled again for 30/OCT/13 and did not show. No response when called.
IDI Debrief Report

- Purpose: To provide a summary of the participant’s attitudes towards the key themes, participant mood, unique comments, and any other important information in REAL TIME.

- Will be discussed on study team calls and shared across sites.
MTN-003D
Stage 2 IDI Debriefing Report

Instructions: This report is to be completed on the same day as the IDI, and forwarded to RTI within one week of IDI completion. This report should be sent via email as a Word document.

Basic IDI Information:

<table>
<thead>
<tr>
<th>PTID:</th>
<th>IDI:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Study Arm:</td>
<td>IDI Date:</td>
</tr>
<tr>
<td>Drug Level Classification:</td>
<td>Interviewer #1:</td>
</tr>
<tr>
<td>Participated in Stage 1 [Y/N]:</td>
<td>Interviewer #2:</td>
</tr>
<tr>
<td>CRS/CTU:</td>
<td>Note-taker:</td>
</tr>
<tr>
<td>IDI Venue:</td>
<td>Person Completing Form:</td>
</tr>
</tbody>
</table>

Debriefing Summary:

1. How did the IDI go today? (Describe in detail your subjective impressions of how the participant behaved, their emotional reactions [excited, sad, laughed, bored, confused, disappointed etc.], and any other important information about the context and experience)

2. How did the participant respond to the PK results discussion? (Record which visual representation was used to describe results to the participant, if any, as well as details about the participant’s emotional/physical reaction that expand upon their reaction recorded on the PSF)

3. What were the most important themes or ideas discussed? (Describe in detail the most important ideas discussed within each of the main topic areas and any important issues that were raised)
   a. Impression of VOICE Results:
   b. Factors Affecting Adherence (distinguish between factors spontaneously mentioned and those discussed upon probing; include issues discussed during the theme card exercise, however record card codes in item 3, below):
   c. Motivation to Join/Stay in the Trial:

4. Record the numeric card codes selected during the theme identification exercise:
   a. New Themes (write out any new themes identified as relevant):
   b. Relevant Cards (Record card codes or descriptions (for new themes, if applicable) in order from most relevant to least relevant, as determined by the participant):
   c. Not Relevant (record codes):
   d. Not Sure/Uncertain (record codes):

5. Were there any unexpected or unanticipated findings? (Record anything unexpected, unanticipated, or new that was learned from this IDI)
QUESTIONS?
