#### Options for Level of Protection
- 50% (half)
- 75% (three-quarters)
- 90% (almost full protection)
- 100% (full protection)
30. Anesu was a participant in ASPIRE who did not wear the ring for the full month. During ASPIRE, Anesu, like all other participants, received reimbursements for her transport and time. If the study had offered Anesu additional cash for wearing the ring for the full month, and this was verified by lab tests, do you think she would have been more likely to have used the ring for the full month?

☐ 1 Yes
☐ 2 No → if No, go to item 32

31. What is the minimum amount of money she would have had to receive for Anesu to keep the ring inserted for the full month?

(Fill in answer and specify amount and currency)

<table>

e. Other ______________________
   ☐ 1 Yes
   ☐ 2 No

33. If Anesu wore the ring for the full month, and she could have gained a lottery ticket with a small chance to win a big prize, do you think she would have been more motivated to use the ring for the full month?

☐ 1 Yes
☐ 2 No

34. What do you think would have been the best incentive for Anesu to wear the ring for the full month: cash, prizes, a lottery ticket or something else?

☐ 1 Cash
☐ 2 Prizes
☐ 3 Lottery
☐ 4 Other, specify:

MTN-032 Behavior Assessment (BA)

Item-Specific Instructions:

- **Item 1:** Record whether or not the participant currently has a primary sex partner.
- **Item 3:** Read aloud “husband” or “primary sex partner,” depending on the participant's response to item 2 (if not currently married).
- **Item 4:** Read aloud “husband” or “primary sex partner,” depending on the participant's response to item 2 (if not currently married).
- **Item 5:** Mark either months or years. If the participant has had the same partner for greater than or equal to 12 months, mark response in years. If less than 12 months, mark response in months. If participant responds with years and months, round to the nearest year (ex: 7 years 2 months should be rounded to 7 years).
- **Item 6:** Read aloud “husband” or “primary sex partner,” depending on the participant's response to item 2 (if not currently married). If the participant does not know her husband’s or primary partner’s exact age, record her best estimate. If she is unable to provide an estimate, record “99”.
- **Item 7:** Read aloud “husband” or “primary sex partner,” depending on the participant's response to item 2 (if not currently married).
- **Item 8:** Record whether or not the participant’s husband or primary partner provides her with any financial and/or material support. This will include things such as money, housing, food, household goods, etc.
- **Item 12:** Complete this item even if the participant is unsure of her partner’s HIV status.
- **Item 13:** Complete this item regardless of the response to item 12. Having a primary sex partner who is taking ARVs could impact the participant's HIV risk, so we want this item answered by all participants who answered item 12.
- **Item 22:** Record the date the participant started the contraceptive method only if participant chooses one of the following methods in item 21: (C) intrauterine device (IUD), (D) oral contraceptives/birth control pills, (E) implant, or (F) injectable contraceptives. If the participant chooses more than one of these methods, mark dates for both and include which date corresponds to which method.
