Section 1. Introduction

This section specifies the sources of procedural information available to MTN-009 study staff, the responsibilities of MTN-009 Investigators of Record (IoRs), and the process by which each study site is approved to begin implementation of MTN-009.

1.1 Sources of Procedural Information

All study procedures must be conducted in accordance with the MTN-009 protocol. The purpose of this manual is to supplement the protocol, not to replace or substitute for it. In the event that this manual is inconsistent with the protocol, the specifications of the protocol take precedence. Please alert MTN Coordinating and Operations Center (CORE) staff at Family Health International (FHI) of any such inconsistencies.

Study implementation questions that are not answered by the protocol, or this manual, should be directed to the MTN-009 Study Management Team. This group consists of representatives of the MTN Coordinating and Operations Center (CORE; Family Health International (FHI)), Statistical and Data Management Center (SDMC), and Network Laboratory (NL) and can be reached using the following email address:

mtn009mgmt@mtnstopshiv.org

Current contact details for all MTN-009 colleagues and collaborators can be found in the directory on the MTN web page:

www.mtnstopshiv.org/people/directory

1.2 Investigator Responsibilities

MTN-009 must be conducted in accordance with the United States Code of Federal Regulations and the International Conference on Harmonization Consolidated Guidance for Good Clinical Practice (GCP). Copies of these regulations and guidelines are referenced in the MTN Manual of Operations (MOP) which can be accessed on the MTN web site.

The DAIDS policies on Requirements for Source Documentation in DAIDS Funded and/or Sponsored Clinical Trials and Requirements for Essential Documents at Clinical Research Sites Conducting DAIDS Funded and/or Sponsored Clinical Trials are useful for interpreting and operationalizing the regulations and guidelines in accordance with DAIDS expectations. These policies can be accessed at:

http://www3.niaid.nih.gov/research/resources/DAIDSClinRsrch

MTN-009 also must be conducted in accordance with all site-specific regulations, policies, and guidelines applicable to human subjects research in general and/or the conduct of study procedures in particular. Copies of all such regulations, policies, and guidelines should be maintained in on-site MTN-009 essential document files (see also Section 3.1 of this manual).
The IoR at each study site must sign a DAIDS Investigator of Record Agreement to formally indicate his/her agreement to conduct MTN-009 in accordance with the study protocol and applicable regulations, guidelines, and policies. The obligations and responsibilities assumed by the IoR when signing the DAIDS Investigator of Record Agreement are listed on the form. IoRs may delegate their obligations and responsibilities for conducting MTN-009 to other study staff members; however, delegation does not relieve the IoR of his/her ultimate responsibility for all study procedures performed and all study data collected. Delegation of IoR responsibilities must be formally documented throughout the period of study implementation.

Consistent with the regulations, guidelines, and policies cited above, the IoR at each study site must obtain and maintain institutional review board and/or ethics committee (IRB/EC) approval of MTN-009 throughout the period of study implementation. See Section 8.4 of the MTN MOP for detailed information on IRB/EC submission, review, approval, and documentation requirements. All sites are encouraged to request an acknowledgement of receipt for all documents submitted to their IRBs/ECs and to request that IRBs/ECs note the effective and expiry dates of all approvals. Documentation of all correspondence to and from all responsible IRBs/ECs (i.e., complete copies of all submissions, responses, and approvals) must be maintained in on-site essential document files.

1.3 Study Activation Process

Prior to undertaking any study procedures, each study site must obtain approval to conduct MTN-009 from all responsible regulatory authorities and IRBs/ECs. Each site also must complete protocol registration procedures with the DAIDS Regulatory Compliance Center Protocol Registration Office and study activation procedures with DAIDS and the MTN CORE, MTN SDMC, and MTN NL. Detailed information on the requirements of these pre-implementation steps can be found in Section 10 of the MTN MOP. On a site-by-site basis, the MTN CORE will issue a Site-Specific Study Activation Notice when all study activation requirements have been met. At each site, no protocol-specified study procedures may be undertaken prior to issuance of the Site-Specific Study Activation Notice.
