## Diary Card Log (DCL)

**Purpose:** The purpose of this log is to capture sticker and other opening events during the course of Wisebag Pilot Study participation.

**General Information/Instructions:** This log is to be completed for every enrolled participant based on her Diary Card as well as discussion with the participant. This log should be completed for all days that the participant had the Wisebag, starting with the first 14 day (enrolment plus 13 days) period.

### Overall instructions:

Enter the PTID in the top left corner of every page of this form and page number at the top right of the page. Use additional pages as needed.

### Item-specific Instructions:

Item	Instruction
Date	The Date column captures the date in which the participant had her enrolment visit and then each consecutive day going forward over the next 13 day period. If the participant presents early for her Exit visit, cross out rows as needed. If the participant is late for her Exit Visit, record additional days on a second page. In this scenario, cross out the labels in column 1, and add subsequent dates. Cross out all unused rows on a page.
Day of the week	Record the day of the week with the following 2 digit labeling system: SU, MO, TU, WE, TH, FR, SA.
# Sticker openings	Record the number of openings for which the participant retrieved a sticker and placed it on the card for the respective day, according to the participant's diary card and report. Each participant will be instructed to remove one sticker per day and put it on her Diary Card, but this may not occur. If there were no sticker openings for that day, record 0. If participants misunderstood the instructions and put more than 1 sticker on the card per day, record that number.
Time quad 1 <sup>st</sup> sticker opening	Record the respective time quadrant (12:00am-5:59am, 6am-11:59am, 12pm-5:59pm, 6pm-11:59pm) for the first sticker opening on that day. Note that if the participant had more than 1 sticker opening on a particular day, the time should be record for the first opening. The times for additional sticker openings can be recorded in comments (right most column) for that row.
# Stickers Retrieved	Despite instructions, participants may retrieve more than 1 sticker each day (to stick on the card or for other purposes), and/ or may place a previously retrieved sticker on the card for a given day. Record the number of stickers that the participant reports retrieving for each particular day.
# Other openings	Record the cumulative number of other bag opening events not previously captured in the # sticker openings column. Note that the # of other openings plus the # of sticker openings should add up to the TOTAL number of openings for that particular day.
Comments	This column is for capture any sticker/other opening details not readily conveyed already by the other columns. For example, if more than 1 sticker opening occurs on a particular day, the details (time quad) of the additional sticker opening can be recorded in comments.
